**pattern recognition and image pdf**
Pattern recognition is the automated recognition of patterns and regularities in data. Pattern recognition is closely related to artificial intelligence and machine learning, together with applications such as data mining and knowledge discovery in databases (KDD), and is often used interchangeably with these terms.

**Pattern recognition - Wikipedia**
Pattern Recognition is a mature but exciting and fast developing field, which underpins developments in cognate fields such as computer vision,...

Theories Template matching. Template matching theory describes the most basic approach to human pattern recognition. It is a theory that assumes every perceived object is stored as a "template" into long-term memory. Incoming information is compared to these templates to find an exact match. In other words, all sensory input is compared to ...

**Pattern recognition (psychology) - Wikipedia**
Pattern Recognition Letters aims at rapid publication of concise articles of a broad interest in pattern recognition. Subject areas include all the current fields of interest represented by the Technical Committees of the International Association of Pattern Recognition, and other developing themes involving learning and recognition.

**[1512.03385] Deep Residual Learning for Image Recognition**
Abstract: Image-based sequence recognition has been a long-standing research topic in computer vision. In this paper, we investigate the problem of scene text recognition, which is among the most important and challenging tasks in image-based sequence recognition.

**An End-to-End Trainable Neural Network for Image-based**
International Journal of Pattern Recognition and Artificial Intelligence is seeking original and unpublished manuscripts for a Special Issue on Facial Image Processing and Analysis, scheduled for publication in 1st Quarter 2009.

**IJPRAI Special Issue on Facial Image Processing and Analysis**
Welcome to the RTIP2R 2018 Biennial meeting/conference . The second international conference on Recent Trends in Image Processing and Pattern Recognition (RTIP2R) aims to attract current and/or advanced researches on image processing, pattern recognition, computer vision and ...

The domain in which I did my research in cognitive science is the Bongard Problems. These are problems on visual pattern recognition that appeared first in the appendix of a book published by the Russian scientist M. M. Bongard in 1967, in what was then the USSR.
